NUM(2.0)

L44. How many years altogether has your (Wife/"WIFE") worked for money since she was 18? V18780-V18781 do not take account of changes in Wife's/"Wife's" employment history since these questions were actually asked. The user may update these variables by recoding data for subsequent years.

See the note at V18734. The values for this variable represent in whole years the actual amount of time the Wife/"Wife" had worked since the age of 18 until the time of the interview. In 1985, this question was re-asked only of then-current Wives/"Wives" who had worked at all since January 1, 1984; all other 1985 Wives/"Wives" were updated. See Section I, Part 5, p. 72 in the Wave XX (1987) documentation for details.

Percent of Head's Total 1989 Labor Income That Was a Major Assignment

The values for this variable in the range 001-100 represent the amount of Head's labor income that required an assignment, expressed as a percent. This variable was calculated by summing the following:

V17829 (Head's wages) if 17830 (accuracy of Head's wages) equaled 2; and  
V17827 (Head's labor income from farming),  
V17828 (Head's labor income from business),  
V17831 (Head's bonuses, overtime and commissions),  
V17832 (Head's income from professional practice or trade),  
V17833 (Head's labor income from market gardening), and  
V17834 (Head's labor income from roomers and boarders) if V17835  
(accuracy of Head's non-wage labor income) equaled 2.

This sum was divided by the sum of these same components without the accuracy code value restriction and using absolute values to produce the percent of assigned income.

**V18882 "ANNUAL NEEDS STD-1989"**

**NUM(5.0)**

Annual Needs Standard for the 1989 (Last Year's) Family

*This is the Orshansky-type poverty threshold based on an annual food needs standard which is derived from the weekly food costs in the preceding variable, converted to an annual amount, and adjusted for economies of scale by USDA rules as follows:*

*Single person . . . . .add 20%*

*Two persons . . . . .add 10%*

*Three persons . . . . .add 5%*

*Four persons . . . . .no change*

*Five persons . . . . .deduct 5%*

*Six or more persons . . . . .deduct 10%*

*An additional adjustment for diseconomies of small households (in rent, etc.) was made as follows:*

*4.89 times the food needs for single persons*

*3.70 times the food needs for two-person units*

*3.00 times the food needs for all other units*

*Please refer to the Wave VII (1974) Documentation volume, pp. 39-41, and to the User Guide for further details on the need standard. Note that this variable is not adjusted for inflation (it makes use of the previous variable, which is in 1967 dollars), nor is it exactly comparable to the official poverty standard; such changes are left to users. This need standard is adjusted for changes in family composition during 1989 and is not adjusted for farmers.*

1989 Total Family Money Income/Needs for 1989 Family (Income/needs ratio)--1967 USDA LOW-COST PLAN

*The formula used in generating this variable is as follows:*

*Total 1989 Family Money Income (V18875)/1989 Family Needs (V18882).*

*This ratio is multiplied by 1.25 for farmers (those coded 801 in V18101, V18202 or V18225) to adjust for lower food costs. This is the only measure of income to needs on this tape which makes this adjustment for farmers. For a full description on the needs standard used, please refer to the Wave VII (1974) Documentation volume, pp. 39-41. Note that this need standard has not been adjusted for inflation (it makes use of the table in V18881, which is in 1967 dollars).*

The threshold values are based on family size, the number of persons in the family under age 18, and the age of the householder. This variable has been adjusted for changes in family composition during 1989 so that it matches part-year incomes included in the total family money income (V18875). **V18936 "HOUSEHOLD ID #"**

**NUM(5.0)**

Household ID Number

This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting a 1990 ID number (V17702) with the lowest value from among the 1990 ID numbers (V17702) of those families comprising each such household group. This value was used in these tape locations for all of the related households. Thus, if the user sorts the data ordered by this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with any other family unit or shared only with non-panel family units were given their own values for V17702. The range of values is 00001-07328 for core sample FUs and 10001-12043 for Latinos, but the series is not contiguous. No Latino sample cases were sharing with another sample family, and so their values for this variable simply equal their values for V17702 (10001-12043). See *Linking Data: Families Sharing Households* in Section 1, Part 5 in the front matter of this volume for a discussion of ways to identify shared households in the early years of the PSID.

**V18937 "# BORN TO HD ONLY IN 89"**

**NUM(1.0)**

Number of Children Born During Calendar Year 1989 to Head But Not Jointly with Wife/"Wife", Husband of Head, or First-Year Cohabiter

The information in V18937-V18940 is based on data gathered in birth history questions interspersed throughout Section J of the 1990 questionnaire. The birth data were asked for:

- a) each male Head, unless all of the following were true: he was also Head in 1989, had the same legal Wife in both waves (V17567=1 and V18918=1 and V17710=0-1), and she was age 45 or older at the time of the 1990 interview.
- b) each female Head, unless both of the following were true: she was Head, Wife, or "Wife" in 1989 and was age 45 or older at the time of the 1990 interview.
- c) each Wife or "Wife", unless both of the following were true: she was Head, Wife, or "Wife" in 1989 and was age 45 or older at the time of the 1990 interview.
- d) all other family unit members, including husbands of Head (V30644=90) and first-year cohabiters (V30644=88), who were age 12 through 44 at the time of the 1990 interview. All Heads and Wives/"Wives" were asked about births.
- e) all Latino sample and Recontact Heads and Wives/"Wives"

The values for this variable indicate the number of children born between January 1, 1989 and December 31, 1989 to the Head but not jointly with the Wife/"Wife", husband of Head, or first-year cohabiter (V30644=20, 22, 90 or 88 respectively), if one is present in the FU. The data are based only on information reported in the 1990 wave. Because of age and relationship variations in what was asked, this information is not known in some cases. If birth questions were asked about the Head but not the Wife/"Wife", husband of Head or first-year cohabiter, then births to Head were counted in this variable.

## V18943 "1990 CORE FAMILY WEIGHT"

1989 Core Sample Family Weight, Updated for 1990

This weight variable is to be used only for analysis of the core sample. If you wish to analyze both the core and Latino samples, then see V18945. If you wish to analyze only the Latino sample, then see V18944.

Note that a few core sample families have values of zero for this variable. These families were followed only for the elderly recontact effort, which included some nonsample individuals.

Weights for the core sample were completely revised in 1989 to account for deaths, marriages to nonsample persons, and differential nonresponse since 1968. See Section I, Part 5, Reweighting 1968-1990, pages 82-97 of the 1989 documentation volume and Section I, Part 5 of this volume for further information. This 1990 weight has been updated for marriages, divorces, etc. since 1989.
