V13896 "LABOR PART FARM Y 86"

NUM(5.0)

1987 Head's Labor Part of Farm Income in 1986 (Question G5)

Labor and asset splits of farm and business income were made using the 1986 work hours on jobs which generated those incomes. The rules are as follows:

- 1) if work hours are greater than or equal to the (positive) dollar amount, then all income is assumed to be labor.*
- 2) if work hours are less than the dollar amount, assume that labor is worth at least \$1.00 per hour and that all income above that amount is split equally between labor and asset.*

Labor Portion=Total farm or business income/2 + work hours/2

Asset Portion=Total farm or business income/2 - work hours/2

- 3) if total farm or business income represents a loss (i.e., a negative number), then the labor portion equals 0 and the loss is coded in the asset portion.*

The values for this variable in the range 00001-99998 represent the labor portion of Head's farm income reported at G5 in whole dollars; all missing data were assigned. The asset portion of farm income is located at V13907.

An additional adjustment for diseconomies of small households (in rent, etc.) was made as follows:

4.89 times the food needs for single persons

3.70 times the food needs for two-person units

3.00 times the food needs for all other units

Please refer to the Wave VII (1974) Documentation volume, pp. 39-41, and to the User Guide for further details on the need standard. Note that this variable is not adjusted for inflation (it makes use of the previous variable, which is in 1967 dollars), nor is it exactly comparable to the official poverty standard; such changes are left to users. This need standard is adjusted for changes in family composition during 1987 and is not adjusted for farmers; see V14674 for an income/needs measure which makes such an adjustment.

V14674 "1986 TOT FAM Y/NEEDS"

NUM(6.2)

Total 1986 Family Money Income/Needs for 1986 Family (Income/needs ratio)

The formula used in generating this variable is as follows:

Total 1986 Family Money Income (V14670)/1986 Family Needs (V14673).

This ratio is multiplied by 1.25 for farmers (those coded 801 in V14154 or 80 in V14208 or V14212) to adjust for lower food costs. This is the only measure of income to needs on this tape which makes this adjustment for farmers. For a full description on the needs standard used, please refer to the wave VII (1974) documentation volume, pp. 39-41. Note that this need standard has not been adjusted for inflation (it makes use of the table in V14672, which is in 1967 dollars).

V14675 "ANNUAL FOOD STD"

NUM(4.0)

Annual 1987 Food Standard

This variable is generated by multiplying the weekly food needs (V14672) by 52 and then making the following adjustments for economies of scale:

 +10% for two-person families
 + 5% for three-person families
 no adjustment for four-person families
 - 5% for five-person families
 -10% for families with six or more persons

The values represent the actual annual food standard in whole dollars for the 1987 (current) family. Note that V14672 is based on a table from 1967, with 1967 dollar values.

This variable is suppressed (filled with zeroes) in the public release file to protect the anonymity of respondents. The data are available in a separate file to qualified users under special contractual arrangements with the PSID; for more information, contact us at PSIDhelp@umich.edu.

These codes are based on matches to the FIPS state and county codes. However, code values have been increased by one. That is, code 01 here is equivalent to code 0 as originally used by Beale and Ross. Metropolitan status is that announced by the Office of Management and Budget in June 1983, when the current population criteria were first applied to results of the 1980 Census. Adjacency was determined by both physical boundary adjacency and a finding that at least 2 percent of the employed labor force in the nonmetropolitan county commuted to metropolitan central counties.

V14700 "# INDS IN ARMED FORCES"

NUM(1.0)

Number of Individuals in the Armed Forces

V14700-V14703 are summaries of information about individuals in institutions, as coded on the individual-level dataset. Such an individual, in order to be included in the following four variables, must have the same 1987 ID number as this family (V30554 must equal V13702) and his or her sequence number (V30555) must equal 51-59. The "reason for nonresponse" variable (V30588) was consulted for the type of institution.

The values for this variable represent the actual number of individuals (1-9) that were in the armed forces. Such individuals must conform to the rule above, and their values for V30588 must equal 11.

V14705 "BRR STRATUM"

NUM(2.0)

Balanced Half-Sample (BHS) Stratum Code

This variable, which for most cases is identical to the first two digits of 1980 V7449, 1981 V8101, and 1982 V8725, (and identical in all cases to 1983 V9410, 1984 V11057, 1985 V12418, and 1986 V13658), was constructed to allow users to calculate proper standard errors for regression coefficients. Families originating from 1968 families were reassigned stratum values in 1983. Splitoffs receive the stratum values assigned to the families in which they were residing in 1968. See Section I, Part 5 of the 1983 (wave XVI) documentation for a more detailed discussion of this variable.

This variable is provided to identify strata necessary in computing proper variances of means and totals using such algorithms as PSALMS in OSIRIS.IV, SESUDAAN in SAS, or CLUSTERS in the World Fertility Surveys. Codes 01-53 identify strata for the self-representing portion of the sample, while code 54 identifies cases from all nonselfrepresenting areas. This variable should be used in conjunction with V14708. See Section I, Part 5 of the 1983 (wave XVI) documentation for a more detailed explanation of this variable.

V14708 "PSALMS SECU"

NUM(3.0)

Paired Selection Sample Error Computation Unit Code

This variable identifies clusters necessary for computing sampling errors for means and totals. For the self-representing portion of the sample (V14707=1-53), V14708 identifies matched pairs of clusters for using in a paired difference model. For the nonself-representing portion (V14707=54), V14708 identifies to which of 115 clusters the case belongs. These 115 clusters are arranged in order of similarity in such a manner as to allow the application of a "successive difference" model in estimating variances of means and totals. This variable should be used in conjunction with V14707.

The range of possible values for this variable is at least 01, but not more than 20. The code value represents the actual number of persons in the second other FU. There are no missing data.

V14732 "HOUSEHOLD ID #"

NUM(4.0)

Household ID Number

This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting a 1987 ID number (V13702) with the lowest value from among the 1987 ID numbers (V13702) of those families comprising each such household group. This value was used in these tape locations for all of the related households. Thus, if the user sorts the data ordered by this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with other panel families were given their own values for V13702. Thus, the range of values is 0001-7061, but the series is not contiguous.

V14738 "CENSUS NEEDS STANDARD-1986"

NUM(5.0)

Annual Needs Standard for the 1986 Family--CENSUS VERSION

This poverty threshold was taken from Census Bureau's website, <http://www.census.gov/hhes/www/poverty/threshld/index.html>. We have used the table entitled 'Poverty thresholds by Size of Family and Number of Children'

The threshold values are based on family size, the number of persons in the family under age 18, and the age of the householder. Due to some of the limitations of our extant files, we were unable to generate the number of months for those individuals who moved out of multiple families in the same wave. Otherwise the calculation of needs is similar to that described in Section I, Part 5, of guide to the 1993 PSID data, 93GUIDE.PDF.
