## ER9245 "USDA NEEDS STANDARD-1995"

NUM(5.0)

Annual Needs Standard for the 1995 Family--USDA Version

This is the Orshansky-type poverty threshold based on an annual food needs standard which is derived from weekly food costs. The weekly food costs are taken from USDA Low-Cost Plan estimates as published in the Family Economics Review, June 1967, and adjusted to take account of changes in family composition during 1995. It is converted to an annual amount and further adjusted for economies of scale by USDA rules as follows:

Single person . . . . . add 20%

Two persons . . . . . add 10%

Three persons . . . . . add 5%

Four persons . . . . . no change

Five persons . . . . . deduct 5%

Six or more persons . . . . . deduct 10%

An additional adjustment for diseconomies of small households (in rent, etc.) was made as follows:

4.89 times the food needs for single persons

3.70 times the food needs for two-person units

3.00 times the food needs for all other units

The table for weekly food costs is located in the Wave XXV (1992) documentation at the description for V21487. The table is in 1967 dollars.

Please refer to the Wave VII (1974) Documentation volume, pp. 39-41, and to the User Guide for further details on the needs standard.

Note that this variable is not adjusted for inflation, nor is it exactly comparable to the official poverty standard; such changes are left to users. This needs standard is adjusted for changes in family composition during 1995 and is not adjusted for farmers.

These codes are based on matches to the FIPS state and county codes. However, code values have been increased by one; that is, code 1 here is equivalent to code 0 as originally used by Beale and Ross. Metropolitan status is that announced by the Office of Management and Budget in June 1983, when the current population criteria were first applied to results of the 1980 Census. Adjacency was determined by both physical boundary adjacency and a finding that at least 2 percent of the employed labor force in the nonmetropolitan county commuted to metropolitan central counties.

Head's Completed Education Level

Values in the range 1-16 represent the actual grade of school completed; e.g., a value of 8 indicates that the Head completed the eighth grade. A code value of 17 indicates that the Head completed at least some postgraduate work.

Education is asked only when the FU acquires a new Head. In cases where the Head has remained the same person from the previous interview (ER9033=5), this variable has been carried forward from previous years' data with no updating or other change. Education was asked of all Heads in 1985.

This variable differs from the individual level variable ER33315 in the treatment of Heads who received a GED but did not attend college. The family-level variable value for such Heads is the highest grade completed; for the individual-level variable, the value is 12.

**ER9250R "HOUSEHOLD ID#"**

NUM(5.0)

Household ID Number

*This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting a 1996 ID number (ER7002) with the lowest value from among the 1996 ID numbers (ER7002) of those families comprising each such household group. This value was used in these file positions for all of the related households. Thus, if the user sorts the data ordered by this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with any other family unit or shared only with non-panel family units were given their own values for ER7002. The range of values is 1-16970, but the series is not contiguous. See 'Linking Data: Families Sharing Households' in Section I, Part 5, of the guide to the 1995 family data, 95GUIDE.PDF, for a discussion of ways to identify shared households in the early years of the PSID.*

For details on the construction of this weight, go to the PSID website, [psidonline.isr.umich.edu/](http://psidonline.isr.umich.edu/): select 'Data & Documentation', then select 'Sample Weights', then PSID Longitudinal Weights, and 'PSID Revised Longitudinal Weights 1993-2005'.

Note that some families have a zero family weight. Most of these families contained nonsample parents of sample children (aged 18 or younger) who reside in another panel family unit.
