V6346 "HD TRAV TO WRK HRS 78"

NUM(3.0)

Head's travel to work time (annual hours) in 1978

The values for this variable in the range 001-998 represent annualized hours spent traveling to and from work. These hours are calculated by multiplying the travel time in hours times the number of trips per week times the number of weeks worked in 1978. Trips per week are assigned on the basis of hours worked per week on the main job (V6516 or V6572) according to the rule below. Note that for a Head who did not work in 1978 but is now working, this variable equals zero. All missing data were assigned.

If hours worked per week were less than 10, either 2 or 4 trips per week were assumed, whichever seemed more reasonable. If less than 20 hours per week were worked, 6 trips per week were used. Under 35 hours worked meant 8 trips assumed; less than 48 indicated 10 trips, and for 48 or more hours, 12 trips.

V6363 "1979 WEEKLY FOOD NEED"

NUM(6.2)

Weekly Food Needs

This variable's values are based on USDA Low-Cost Plan estimates of weekly food costs, according to the table below (reproduced from Family Economics Review, June 1967), summed for the family as it was at the time of the interview.

INDIVIDUAL FOOD STANDARD (LOW COST)

- \$3.90 for both males and females under age 4
- \$4.60 for both males and females age 4-6
- \$5.50 for both males and females age 7-9
- \$6.40 for males age 10-12
- \$6.30 for females age 10-12
- \$7.40 for males age 13-15
- \$6.90 for females age 13-15
- \$8.70 for males age 16-20
- \$7.20 for females age 16-20
- \$7.50 for males age 21-35
- \$6.50 for females age 21-35
- \$6.90 for males age 36-55
- \$6.30 for females age 36-55
- \$6.30 for males age 56 and older
- \$5.40 for females age 56 and older

This same standard has been used in previous waves. Since the table is from 1967, values are in 1967 dollars. Adjustments for inflation, etc., are left to users.

The actual weekly food needs in dollars and cents are coded here.

V6364 "1979 ANN FOOD NEED"

NUM(5.0)

Annual Need Standard in 1978

This is the Orshansky-type poverty threshold based on an annual food needs standard which is derived from the weekly food costs in the preceding variable, converted to an annual amount, and adjusted for economies of scale by USDA rules as follows:

Single person add 20%

Two persons add 10%

Three persons add 5%

Four persons no change

Five persons deduct 5%

Six or more persons deduct 10%

An additional adjustment for diseconomies of small households (in rent, etc.) was made as follows:

- 4.89 times the food needs for single persons
- 3.70 times the food needs for two-person units
- 3.00 times the food needs for all other units

Please refer to the Wave VII (1974) Documentation volume, pp. 39-41, and to the User Guide for further details on the need standard. (It makes use of the table in the previous variable, which is in 1967 dollars.) Note that this variable is not adjusted for inflation, nor is it exactly comparable to the official poverty standard; such changes are left to users. This need standard is adjusted for changes in family composition during 1978 and is not adjusted for farmers.

V6497 A "OCCUPATION OF HEAD 79" NUM(3.0)

- C6. What is your main occupation? What sort of work do you do?
- C7. Tell me a little more about what you do.
- D13. What sort of work did you do on your last job? (What was your occupation?)
- E4. What sort of work did you do? (What was your occupation?)

This version of occupation was coded retroactively using original PSID reports and the three-digit 1970 Census occupation codes for a selected sample of PSID Heads and Wives/"Wives":

- (a) Original sample Heads and Wives/"Wives still living by 1992 who reported main jobs in at least three waves during the period 1968-1992, with at least one of those reports prior to 1980.
- (b) Additionally, original sample Heads and Wives/"Wives" who had reported at least one main job between 1968 and 1980 but were known to have died by 1992.

The selection criteria did not include all Heads and Wives/"Wives" who had worked between 1968 and 1980. Those who were still living but had reported only one or two jobs during the period of interest were excluded, as were all nonsample Heads and Wives/"Wives". Therefore not every Head or Wife/"Wife" has data for this variable. For detailed information about the Retrospective Coding Project, please see the document, 'A Panel Study of Income Dynamics: 1968-1980 Retrospective Occupation-Industry Files Documentation', on our website.

The 3-digit industry code from 1970 Census of Population; Alphabetical Index of Industries and Occupations issued June 1971 by the U.S. Department of Commerce and the Bureau of the Census was used for this variable. Please refer to Appendix V2, Wave XIV documentation, for complete listings.

V6596 A "OCCUPATION OF WIFE

79"

NUM(3.0)

- F7. What is your (wife's/friend's) main occupation? (What sort of work does she do?)
- F8. Tell me a little more about what she does.
- G6. What sort of work did your (wife/friend) do on her last job? (What was her occupation?)
- H4. What kind of work did she do? (What was her occupation?)

This version of occupation was coded retroactively using original PSID reports and the three-digit 1970 Census occupation codes for a selected sample of PSID Heads and Wives/"Wives":

- (a) Original sample Heads and Wives/"Wives still living by 1992 who reported main jobs in at least three waves during the period 1968-1992, with at least one of those reports prior to 1980.
- (b) Additionally, original sample Heads and Wives/"Wives" who had reported at least one main job between 1968 and 1980 but were known to have died by 1992.

The selection criteria did not include all Heads and Wives/"Wives" who had worked between 1968 and 1980. Those who were still living but had reported only one or two jobs during the period of interest were excluded, as were all nonsample Heads and Wives/"Wives". Therefore not every Head or Wife/"Wife" has data for this variable. For detailed information about the Retrospective Coding Project, please see the document, 'A Panel Study of Income Dynamics: 1968-1980 Retrospective Occupation-Industry Files Documentation', on our website.

The 3-digit industry code from 1970 Census of Population; Alphabetical Index of Industries and Occupations issued June 1971 by the U.S. Department of Commerce and the Bureau of the Census was used for this variable. Please refer to Appendix V2, Wave XIV documentation, for complete listings.

V6762 "M37 RECORD RELIG PREF"

NUM(1.0)

M37. Now, we would like to ask for your religious preference. This involves a right that is protected by the United States Constitution. You are under no obligation to answer these questions, and, if for any reason you decide you do not wish to answer them, we will accept and respect your decision. The information requested is important to us, and we hope you will decide to answer them. May we record your religious preference? This question was not asked in 1968 through 1975. In 1976 and 1977, it was added to the background questions for new Heads only. It was dropped in 1978 and then added once again in 1979 for new Heads only. If the family has had the same Head since 1975 or has had a new Head only in 1978, the value for this variable is zero.

V6763 "M38-39 RELIG PREF"

NUM(1.0)

M38, M39. Is your religious preference Protestant, Catholic, or Jewish, or what? What denomination is that?

This question was asked for all Heads in 1970, and for the 1971 through 1977 interviews was asked for all new Heads with values being brought forward from previous data each year for families with the same Heads. In 1978, however, the question was not asked. This wave (1979), when this question was reinserted into the questionnaire, values were not brought forward from 1977 for families with unchanged Heads since that time. Therefore, any cases with 1979 reinterview Heads who were Heads in 1978 must by necessity contain missing data (i.e., a value of zero). For those cases with the same Heads from 1977 through the present, please use 1977 religious preference, V5617.

V6770 "ANNUAL FOOD STD"

NUM(4.0)

Annual Food Standard

This variable is generated by multiplying the weekly food needs (V6363) by 52 and then making the following adjustments for economies of scale:

Add 20 percent for one-person families,

- 10 percent for two-person families,
- 5 percent for three-person families,

and subtract

- 5 percent for five-person families and
- 10 percent for families with six or more persons.

See note at V6363 (weekly food needs, used in computing this variable) regarding use of 1967 dollar values.

V6814 "HOUSEHOLD ID # 79"

NUM(4.0)

Household Identification Number

This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting a 1979 ID number (V6302) with the lowest value from among the 1979 ID numbers of those families comprising each such household group. This value was used in these file positions for all of the related households. Thus, if the user sorts the data ordered by this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with any other family unit or shared only with non-panel family units were given their own values for V6302.

V6816 "CENSUS NEEDS STANDARD-1978"

NUM(5.0)

Annual Needs Standard for the 1978 Family--CENSUS VERSION

This poverty threshold was taken from Census Bureau's website, http://www.census.gov/hhes/www/poverty/data/threshld/index.html We have used the table entitled 'Income Thresholds at the Poverty Level by Sex of Head, Size of Family, and Number of Related Children Under 18 Years Old, by Farm-Nonfarm Residence.' We used Non-Farm Residence tabulations.

The threshold values are based on sex of Head, family size, the number of persons in the family under age 18, and the age of the householder. Due to some of the limitations of our extant files, we were unable to generate the number of months for those individuals who moved out of multiple families in the same wave. Otherwise the calculation of needs is similar to that described in Section I, Part 5, of guide to the 1993 PSID data, 93GUIDE.PDF.
