V12556 "HD HRS TRAVEL TO WORK 85"

NUM(3.0)

1986 Head's Annual Hours of Travel to Work in 1985

The values for this variable in the range 001-998 represent annualized hours spent traveling to and from work. These hours are calculated by multiplying the travel time in hours times the number of trips per week times the number of weeks worked in 1985. Trips per week are assigned on the basis of hours worked per week on the main job (V13106 or V13199) according to the rule below. Note that for a Head who did not work in 1985 but is now working, this variable equals zero. All missing data were assigned.

If hours worked per week were less than 10, either 2 or 4 trips per week were assumed, whichever seemed more reasonable. If less than 20 hours per week were worked, six trips per week were used. Under 35 hours worked meant 8 trips assumed; less than 48 indicated 10 trips, and for 48 or more hours, twelve trips.

V12668 "WF HRS TRAVEL TO WORK 85"

NUM(3.0)

1986 Wife's/"Wife's" Annual Hours of Travel to Work in 1985

The values for this variable in the range 001-998 represent annualized hours spent traveling to and from work. These hours are calculated by multiplying the travel time in hours times the number of trips per week times the number of weeks worked in 1985. Trips per week are assigned on the basis of hours worked per week on the main job (V13283 or V13367) according to the table below. Note that for a Wife/"Wife" who did not work in 1985 but is now working, this variable equals zero. All missing data were assigned.

If hours worked per week were less than 10, either 2 or 4 trips per week were assumed, whichever seemed more reasonable. If less than 20 hours per week were worked, six trips per week were used. Under 35 hours worked meant 8 trips assumed; less than 48 indicated 10 trips, and for 48 or more hours, twelve trips.

V12794 "LABOR PART FARM Y 85"

NUM(5.0)

1986 Head's Labor Part of Farm Income in 1985 (Question G5)

Labor and asset splits of farm and business income were made using the 1985 work hours on jobs which generated those incomes. The rules are as follows:

- 1) if work hours are greater than or equal to the (positive) dollar amount, then all income is assumed to be labor.
- 2) if work hours are less than the dollar amount, assume that labor is worth at least \$1.00 per hour and that all income above that amount is split equally between labor and asset.

Labor Portion=Total farm or business income/2 + work hours/2

Asset Portion=Total farm or business income/2 - work hours/2

3) if total farm or business income represents a loss (i.e., a negative number), then the labor portion equals 0 and the loss is coded in the asset portion.

The values for this variable in the range 00001-99998 represent the labor portion of Head's farm income reported at G5 in whole dollars; all missing data were assigned.

V12800 "LABOR PT MKT GARDEN 85"

NUM(5.0)

1986 Head's Labor Portion of Income from Farming or Market Gardening in 1985 (Question G19:b)

Labor and asset splits of farming/market gardening were made using the 1985 work hours from the job that generated that income. The rule for these splits assumes 75% of the dollar amount is labor income, and the remaining 25% is asset income. If a loss is reported, then the labor portion equals zero and the loss is coded in the asset portion.

The values for this variable in the range 00001-99998 represent the labor portion of the farming and market gardening income reported at F19:b in whole dollars; all missing data were assigned. The asset portion of this income is located at V12807.

NUM(5.0)

1986 Head's Labor Portion of Income from Roomers and Boarders in 1985 (Question G19:c) Labor and asset splits of income from roomers and boarders were made using the 1985 work hours from the job which generated this income. The rules are as follows:

- 1) If Head owns the home, total income is split 50-50 into labor and asset.
- 2) If Head rents the home, all income is assumed to be labor income.

The values for this variable in the range 00001-99998 represent the labor portion of the income from roomers and boarders reported at G19:c in whole dollars; all missing data were assigned. The asset portion of this income is located at V12808.

Contingencies followed for this variable depended on the degree to which the reply was uncodable. If there were missing data among codes 1, 2 and 3 (that is, no gap occurred between employment spells), V13077-V13092 were coded if the questions were answered. The same rule was followed for those who experienced a gap (codes 4, 5 and 7). If it was unclear whether or not a gap had occurred, however, then V13077-V13092 were coded zero.

C33. We want to know what you (HEAD) were doing just before you started that (position/work situation). Did you have another position with the same employer, were you unemployed and looking for work, temporarily laid off, working for a different employer, self-employed, or what?

Contingencies followed for this variable depended on the degree to which the reply was uncodable. If there were missing data among codes 1, 2 and 3 (that is, no gap occurred between employment spells), V13171-V13182 were coded if the questions were answered. The same rule was followed for those who experienced a gap (codes 4, 5 and 7). If it was unclear whether or not a gap had occurred, however, then V13171-V13182 were coded zero.

NUM(2.0)

K44. How many years altogether has your (Wife/"WIFE") worked for money since she was 18? V13485-V13532 are asked only when the FU acquires a new Wife/"Wife". In cases where the Wife/"Wife" has remained the same person from the previous interview, these variables have been carried forward from the previous year's data with no updating or other change. V13531-V13532 do not take account of changes in Wife's/"Wife's" employment history since these questions were actually asked. The user may update these variables by recoding data for subsequent years.

The values for this variable represent in whole years the actual amount of time the Wife/"Wife" had worked since the age of 18 until the time of the interview. In 1985, this question was re-asked only of then-current Heads and Wives/"Wives" who had worked at all since January 1, 1984. Therefore, information is incomplete for some individuals.

V13532 "K45 #YR WRKD FULL-TIME W"

NUM(2.0)

K45. How many of these years did she work full-time for most or all of the year? V13485-V13532 are asked only when the FU acquires a new Wife/"Wife". In cases where the Wife/"Wife" has remained the same person from the previous interview, these variables have been carried forward from the previous year's data with no updating or other change. However, V13485-V13532 were asked of all Wives/"Wives" in 1985. Values for V13485-V13532 were brought forward from 1985, as indicated by V13669.

V13531-V13532 do not take account of changes in Wife's/"Wife's" employment history since these questions were actually asked. The user may update these variables by recoding data for subsequent years.

The values for this variable represent in whole years the actual amount of time the Wife/"Wife" had worked full time since the age of 18 until the time of the interview. In 1985, this question was re-asked only of then-current Heads and Wives/"Wives" who had worked at all since January 1, 1984. Therefore, information is incomplete for some individuals.

V13605 "L57 #YR WRKD FOR \$ >18 H"

NUM(2.0

L57. How many years altogether have you (HEAD) worked for money since you were 18? V13534-V13606 are asked only when the FU acquires a new Head. In cases where the Head has remained the same person from the previous interview, these variables have been carried forward from the previous year's data with no updating or other change. However, V13551-V13606 were re-asked of all Heads in 1985. Values for V13534-V13550 were brought forward from 1985 or earlier years, as indicated by V13668.

V13605-V13606 do not take account of changes in Head's employment history since these questions were actually asked. The user may update these variables by recoding data for subsequent years.

The values for this variable represent in whole years the actual amount of time the Head had worked since the age of 18 until the time of the interview. In 1985, this question was re-asked only of then-current Heads and Wives/"Wives" who had worked at all since January 1, 1984. Therefore, information is incomplete for some individuals.

Negative amounts and zeroes are not allowed for this variable because it is used in the generation of the income/needs ratio. The values represent the summation of the following variables:

V13624 "TOTAL HEAD LABOR Y 85"

NUM(6.0)

Total 1985 Labor Income of 1986 Head

The values for this variable represent the actual amount of Head's labor income in whole dollars and sum the following variables:

V13625 "WEEKLY FOOD NEEDS-1986"

NUM(4.1)

Weekly Food Needs

This variable's values are based on USDA Low-Cost Plan estimates of weekly food costs, according to the table below (reproduced from Family Economics Review, June 1967), summed for the family as it was at the time of the interview.

INDIVIDUAL FOOD STANDARD (LOW COST)

```
$3.90 for both males and females under age 4
$4.60 for both males and females age 4-6
$5.50 for both males and females age 7-9
$6.40 for males age 10-12
$6.30 for females age 10-12
$7.40 for males age 13-15
$6.90 for females age 13-15
$8.70 for males age 16-20
$7.20 for females age 16-20
$7.50 for males age 21-35
$6.50 for females age 21-35
$6.90 for males age 36-55
$6.30 for females age 36-55
$6.30 for males age 56 and older
$5.40 for females age 56 and older
```

This same standard has been used in previous waves. Since the table is from a 1967 publication, values are in 1967 dollars. Adjustments for inflation, etc., are left to users.

The actual weekly food needs in dollars and cents are coded here.

OSIRIS USERS: Note that this variable is defined in the dictionary as having two decimal places.

V13626 "ANNUAL NEEDS STD-1985"

NUM(5.0)

Annual Needs Standard for the 1985 (Last Year's) Family

This is the Orshansky-type poverty threshold based on an annual food needs standard which is derived from the weekly food costs in the preceding variable, converted to an annual amount, and adjusted for economies of scale by USDA rules as follows:

Single person add 20%

Two persons add 10%

Three persons add 5%

Four persons no change

Five persons deduct 5%

Six or more persons deduct 10%

An additional adjustment for diseconomies of small households (in rent, etc.) was made as follows:

- 4.89 times the food needs for single persons
- 3.70 times the food needs for two-person units
- 3.00 times the food needs for all other units

Please refer to the Wave VII (1974) Documentation volume, pp. 39-41, and to the User Guide for further details on the need standard. Note that this variable is not adjusted for inflation (it makes use of the previous variable, which is in 1967 dollars), nor is it exactly comparable to the official poverty standard; such changes are left to users. This need standard is adjusted for changes in family composition during 1985 and is not adjusted for farmers; see V13627 for an income/needs measure which makes such an adjustment.

V13627 "1985 TOT FAM Y/NEEDS"

NUM(5.2)

Total 1985 Family Money Income/Needs for 1985 Family (Income/needs ratio)

The formula used in generating this variable is as follows:

Total 1985 Family Money Income (V13623)/1985 Family Needs (V13626).

This ratio is multiplied by 1.25 for farmers (those coded 801 in V13054 or 80 in V13110 or V13114) to adjust for lower food costs. This is the only measure of income to needs on this tape which makes this adjustment for farmers. For a full description on the needs standard used, please refer to the wave VII (1974) documentation volume, pp. 39-41. Note that this need standard has not been adjusted for inflation (it makes use of the table in V13625, which is in 1967 dollars).

V13628 "ANNUAL FOOD STD"

NUM(4.0)

Annual 1986 Food Standard

This variable is generated by multiplying the weekly food needs (V13625) by 52 and then making the following adjustments for economies of scale:

+20% for one-person families, +10% for two-person families, +5% for three-person families, no adjustment for four-person families, -5% for five-person families, -10% for families with six or more persons.

The values represent the actual annual food standard in whole dollars for the 1986 (current) family. Note that V13625 is based on a table from 1967, with 1967 dollar values.

These codes are based on matches to the FIPS state and county codes. However, code values have been increased by one. That is, code 01 here is equivalent to code 0 in the original Beale-Ross schema. Metropolitan status is that announced by the Office of Management and Budget in June 1983, when the current population criteria were first applied to results of the 1980 Census. Adjacency was determined by physical boundary adjacency and a finding that at least 2 percent of the employed labor force in the nonmetropolitan county commuted to metropolitan central counties.

V13653 "# INDS IN ARMED FORCES"

NUM(1.0)

Number of Individuals in the Armed Forces

V13653-V13656 are summaries of information about individuals in institutions, as coded on the individual-level dataset. Such an individual, in order to be included in the following four variables, must have the same 1986 ID number as this family (V30498 must equal V12502) and his or her sequence number (V30499) must equal 51-59. The reason for nonresponse variable (V30533) was consulted for the type of institution.

The values for this variable represent the actual number of individuals (1-9) that were in the armed forces. Such individuals must conform to the rule above, and their values for V30552 must equal 11.

This variable, which for most cases is identical to the first two digits of 1980 V7449, 1981 V8101, and 1982 V8725, (and identical in all cases to 1983 V9410, 1984 V11057, and 1985 V12418), was constructed to allow users to calculate proper standard errors for regression coefficients. Families originating from 1968 families were reassigned stratum values in 1983. Splitoffs receive the stratum values assigned to the families in which they were residing in 1968. See Section I, Part 5 of the 1983 (wave XVI) documentation for a more detailed discussion of this variable.

NUM(2.0)

Paired Selection Stratum Code

This variable is provided to identify strata necessary in computing proper variances of means and totals using such algorithms as PSALMS in OSIRIS.IV, SESUDAAN in SAS, or CLUSTERS in the World Fertility Surveys. Codes 01-53 identify strata for the self-representing portion of the sample, while code 54 identifies cases from all nonselfrepresenting areas. This variable should be used in conjunction with V13661. See Section I, Part 5 of the 1983 (wave XVI) documentation for a more detailed explanation of this variable.

V13661 "PSALMS SECU"

NUM(3.0)

Paired Selection Sample Error Computation Unit Code

This variable identifies clusters necessary for computing sampling errors for means and totals. For the self-representing portion of the sample (V13660=1-53), V13661 identifies matched pairs of clusters for using in a paired difference model. For the nonself-representing portion (V13660=54), V13661 identifies to which of 115 clusters the case belongs. These 115 clusters are arranged in order of similarity in such a manner as to allow the application of a "successive difference" model in estimating variances of means and totals. This variable should be used in conjunction with V13660.

Year in Which 1986 Head Most Recently Became New Head

This variable contains the last two digits of the year of data collection in which background information in V13534-V13550 was most recently gathered for the 1986 Head. If a Head splits off from the main family, e.g., through divorce, background information is re-asked. Some of this information can change over time; thus, this variable can be used by the analyst to indicate which waves of data might be searched to update the variables concerned. However, in 1985, most background information (1986: V13551-V13606) was reasked.

V13682 "HOUSEHOLD ID #"

NUM(4.0)

Household ID Number

This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting one 1986 ID number (V12502), the lowest value, from among the 1986 ID numbers (V12502) of those families comprising each such household group. This value was used in these tape locations for all of the related households. Thus, if the user sorts the data on this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with other panel families were given their own values for V12502. Thus, the range of values is 0001-7018, but the series is not contiquous.

This poverty threshold was taken from Census Bureau's website, http://www.census.gov/hhes/www/poverty/threshld/index.html. We have used the table entitled 'Poverty thresholds by Size of Family and Number of Children'

The threshold values are based on family size, the number of persons in the family under age 18, and the age of the householder. Due to some of the limitations of our extant files, we were unable to generate the number of months for those individuals who moved out of multiple families in the same wave. Otherwise the calculation of needs is similar to that described in Section I, Part 5, of guide to the 1993 PSID data, 93GUIDE.PDF.
